

ACC Guidelines on Fence Stain

In our **August 2003 newsletter**, we advised ALL homeowners of the following:

You are able to stain your fence in a natural wood coloring once you have completed and submitted an ACC Request Form including a sample of the stain color AND obtained written approval from the ACC. Several homeowners have already obtained approval and stained their fence with BEHR Plus 10 semi-transparent stain color Cedar Naturaltone 533. This color will vary slightly depending on the wood type it is applied to (i.e., cedar, pressure treated green, pine or redwood).
